Y23 CAPSTONE PROJECT

Guidelines to the Students

These guidelines set out what is expected of every student team through the Capstone Project. They should be read together with the Guidelines to the Project Guides and the Capstone Project Guidelines and Evaluation Rubrics.

1. Research Diary and Attendance

- Each project batch must maintain a Research Diary documenting weekly work, meeting discussions with the guide, tasks completed, challenges faced, and next steps. The diary must be signed regularly by the guide and produced at every review.
- Meet your guide consistently, ideally once a week, to ensure proper mentoring, tracking, and feedback. Waiting until review time to show progress is not acceptable.
- Ensure that your weekly attendance is recorded in the ERP by your guide during each meeting. Failure to do so may put you at risk of detention.
- Actively participate in classwork sessions, guide meetings, and team reviews. Each of these carries its own attendance requirement, and falling short may put you at risk of detention. (See the department notice for the exact minimum attendance percentage for each component.)

2. Continuous Evaluation Presentations

- As a team, present your project status at least twice a month during the scheduled class hours allocated for the project. These presentations contribute to your Continuous Evaluation marks and are assessed individually for each team member by the faculty conducting the session.

3. Academic Integrity and Ethics

- Strict plagiarism and malpractice policies apply to all projects. Any student found engaging in such activities will be subject to penalties under the University's established regulations.
- Adhere strictly to data collection and AI usage ethics. Refer to the relevant institutional guidelines for further clarity and compliance.

4. Work Progression and Submission

- Carry out project work progressively throughout the semester. Last-minute effort is not an acceptable substitute for consistent progress and will be reflected in your evaluation.
- Submit your presentation, documentation, and code (if applicable) at least 2 days before each internal review (Reviews 1–3). The Final End-Semester External Review requires documents 2–3 days in advance — check the exact date on the review schedule. Late submissions may result in a deduction of marks or disqualification from the review.

5. Review Conduct and Professionalism

- Prepare presentations that are clear and concise, covering all key elements of the project. Every team member must participate and be able to answer questions about their own role and the project.
- The working module or code must be demonstrated live during the review. Screenshots or non-working prototypes will not be accepted as proof of development.
- Reviews will not be conducted if your guide is absent — it is the team's responsibility to keep the guide informed and confirm their availability ahead of every review.
- All team members must be present for every review. Absence must be justified in writing and approved in advance, or it will affect that member's individual evaluation.

- Dress in formal attire and maintain professional conduct during reviews — treat them as formal evaluations, comparable to interviews or project defences.

6. Basis of Continuous Assessment

- Continuous internal assessment is based on consistent effort, proper planning, documentation, technical depth, teamwork, communication skills, and adherence to review guidelines — not on final output alone.

For the full marks breakdown, rubrics, and review-wise evaluation criteria referenced above, see the Capstone Project Guidelines and Evaluation Rubrics document.
